## P R E F A C E

This is the Fifteenth issue of the Publication "Estimates of Area and Production of Principal Crops in India". It contains statistics of area, production and yield per acre of Principal Crops alongwith the rainfall data. It gives all - India figures for the decennium ending 1954-55, and State-wise data for the quinquennium ending 1954-55.

The detailed work involved in the preparation of this volume has been done in the Agricultural Intelligence (Estimates) Branch of the Directorate of Economics and Statistics.

S.R. SEN  
Economic and Statistical Advisor,  
Ministry of Food and Agriculture.

New Delhi,  
January, 1956.

NOTES AND ABBREVIATIONS

NOTES

1. The figures of area and production for 1953-54 as given in this publication are the 'Revised Estimates' and as such do not tally with the 'Final Estimates' published in the forty ninth issue of 'Estimates of Area and Production of Principal Crops in India' and the 'Partially Revised Estimates' as released from time to time alongwith the 1954-55 Final Estimates. For 1954-55, the figures are the 'Final Estimates' and are, therefore, subject to revision.

2. The method of estimation of area has changed during the past few years in certain States. In the case of Bihar, the State Government have switched over from the chowkidari system of reporting the acreage to that of complete enumeration. In the case of West Bengal, the State Government have changed over from the traditional method of reporting the acreages to the method of Random Sample Surveys. The table below indicates the crops alongwith the years from which the method of estimation has changed in these States.

State	Crops	Year from which the method of estimation has changed.
Bihar	Rice, Maize, Wheat, Barley, Gram, Sugarcane, Jute and Tobacco.	1948-49
	Jowar, Bajra, Ragi, Sesamum, Rape and Mustard, Linseed and Castorseed.	1949-50
West Bengal*	Rice .. ..	1947-48
	Gram .. ..	1948-49
	Wheat, Barley, Linseed, Rape and Mustard and Jute	1949-50
	Sugarcane .. ..	1950-51
	Jute .. ..	1951-52

\* In the case of jute, the acreage was based on random sample surveys in 1949-50 and on eye-estimates in 1950-51. Since 1951-52, it has been based on random sample surveys except in the case of Darjeeling district.

3. As a result of investigations carried out over a number of years, the supremacy of the objective technique of Random Sample Crop Cutting Experiments over the traditional method of estimating the production of crops has been established and gradually the States have been carrying out such crop cutting surveys on more and more crops. The table below gives the crops, alongwith the years, for which production estimates are based on Random Sample Crop - cutting Experiments in each State;

State	Crops	Year from which the method of crop-cutting surveys has been adopted.
Andhra	Rice	1953-54
Assam/	Rice	1951-52
	Jute and Potato.	1952-53
Bihar	Rice and Wheat	1948-49
	Barley and Gram.	1949-50
Bombay	Rice, Jowar, Bajra and Wheat.	1949-50
	Maize, Groundnut, Cotton, Tobacco, ) and Gram . )	1951-52
Madhya Pradesh	Rice, Jowar, Wheat, Gram and Tur.	1951-52
	Cotton	1954-55
Punjab	Rice, Wheat, Barley and Gram.	1951-52
	Jowar, Bajra and Maize.	1952-53
Uttar Pradesh	Wheat, Barley and Gram	1949-50
	Rice, Jowar, Bajra and Maize.	1950-51
	Tur.	1951-52
	Cotton.	1953-54
West Bengal*	Rice.	1947-48
	Wheat, Barley, Gram, Rape and ) Mustard, Linseed and Jute. )	1949-50
	Sugarcane.	1950-51
	Jute and Potato (winter).	1951-52
	Tur	1952-53
Hyderabad	Wheat.	1951-52
	Rice (Autumn), Jowar, Bajra and Maize.	1952-53
Mysore	Rice, Jowar, Bajra and Ragi.	1951-52.
Pepsu	Wheat and Gram. . .	1951-52
	Bajra and Maize.	1952-53
	Sugarcane	1954-55
Rajasthan	Wheat, Barley and Gram.	1951-52
	Jowar, Bajra and Maize.	1952-53
	Cotton.	1953-54
Ajmer	Wheat.	1952-53
	Jowar, Maize and Barley.	1953-54
Bhopal	Rice, Jowar, and Wheat.	1951-52
	Gram.	1952-53
Coorg	Rice.	1952-53
Delhi	Wheat.	1952-53
Himachal Pradesh	Rice and Wheat	1953-54
Vindhya Pradesh	Rice, Jowar, Maize, Wheat, ) Barley and Gram )	1952-53

\* Plain districts only.

\* In the case of jute, production was based on random sample surveys in 1949-50 and on eye estimates in 1950-51. Since 1951-52 it has been based on random sample surveys except in the case of Darjeeling district.

4. (a) Data for Jammu & Kashmir for 1949-50 and subsequent years exclude that for the Pakistan - held portion of the State.

(3) Data for Madhya Pradesh from 1950-51 are inclusive of estimates for crop grown in Forest areas also.

5. The crops given in this publication are broadly divided into three groups viz. Forecast crops, Non-forecast crops and Plantation crops.

Forecast Crops: These include Rice, Jowar, Bajra, Maize, Ragi, Small Millets, Wheat, Barley, Gram, Tur, Other Pulses, Potato, Sugarcane, Ginger, Pepper, Chillies, Tobacco, Groundnut, Castorseed, Sesamum, Rape and Mustard, Linseed, Cotton, Jute and Mesta. Regular all-India estimates are issued for them. The figures in respect of Cereals and Gram relate to both 'reporting and non-reporting' areas while those for other crops, refer to 'reporting' areas only. Figures for 'non-reporting' areas, if any, for other crops are not available. Estimates of area and production of food-grains for the 'non-reporting' areas for 1945-46 to 1947-48 are based on the average for the seven years (ending 1942-43), allowance having been made from year to year for the transference of a 'non-reporting' area to the 'reporting' basis. The estimates of these areas for 1948-49 to 1954-55 are based either on special returns received from the State Governments or have been estimated on the basis of information available in the Season and Crop Reports and the Returns of Agricultural Statisticians. The figures for the 'non-reporting' areas for the two periods -(i) upto 1947-48 and (ii) 1948-49 to 1954-55 are thus not strictly comparable in coverage or method of estimation. The figures for the "Reporting" areas upto 1953-54 are Revised Estimates, while those for 1954-55 are Final Estimates. The figures for 1954-55 are, therefore, subject to revision. The figures for the years 1949-50 to 1954-55 are not strictly comparable with those for earlier years in the case of States where there has been either an extension in coverage or changes in the method of estimation.

Non-forecast crops: These cover Bananas (including Plantations) Papaya, Sweet-potatoes, Tapioca, Turmeric, Sann-hemp, Indigo, Lac and Opium. Estimates of area and production of these crops are ad-hoc estimates as distinct from the regular estimates of forecast crops, and therefore, do not have the same degree of accuracy as the forecast crops. They are necessarily tentative and their reliability cannot be vouchsafed.

Plantation crops: Plantation crops include Tea, Coffee, Rubber, and Coconuts. Estimates of area and production of Tea, Coffee, and Rubber are based on special returns received from the State Governments in connection with all-India publications on these crops. The estimates for Coconuts are again ad hoc estimates similar to those of Non-forecast crops.

6. The data in respect of lac have been furnished by the Indian Central Lac Cess Committee and those of Opium by the Narcotics Commissioner, Simla.

7. Figures of Tea and Rubber relate to calendar years i.e. figures for 1947-48 relate to 1947 and so on.

8. Data for 1954-55 in respect of Tea and Coffee have not yet become available.

9. The average yields per acre given in this publication have been obtained by dividing the total production by the corresponding total acreage sown to each crop. In case of Tea and Coffee, they relate to 'plucked' area and in the case of Rubber to 'tapped' area.

10. Production of Sann-hemp is estimated in terms of dry fibre.

11. Figures for Sesamum, Rape and Mustard and Linseed in the case of U.P. are inclusive of estimates for areas sown under 'Mixed crops' as well.
12. Production of sugarcane is expressed both in terms of Cane and Raw Sugar (Gur or Jaggery).
13. Production of Groundnut is given in terms of 'Nuts in shell'.
14. Production of cotton is given in terms of 'Lint Cotton' and in bales of 392 lbs. each. Revised classification of Cotton came into effect from 1952-53 and variety-wise details according to this new classification have been given from 1952-53 to 1954-55 separately.
15. Production data of cottonseed given in this publication for the available three-year period - 1952-53 to 1954-55 are of provisional nature only, hence they have been deduced on the basis of approximate lint to seed ratio.
16. Production of Jute and mesta is given in terms of fibre and in bales of 400 lbs. each.
17. Data in respect of minor (non-forecast) crops except indigo, opium and lac and of plantation crops save coffee for certain years prior to 1953-54 published in the earlier issues of this publication have now undergone revision due to more reliable data becoming available from the States.

ABBREVIATIONS:

- (a) - Less than 500 acres.
- (b) - Less than 500 tons (unless otherwise stated)
- \* - Data for the preceding or following year have been repeated.
- @ - Estimated.
- - Negligible or Nil.
- N.A. - Not available.
- Neg. - Negligible.
